EDUCATION

Dual bachelor's degree: Translation Studies and Computer Science SEP 2023 TO JUN 2027 (EXPECTED)

Guangdong University of Foreign Studies · Macao Polytechnic University · Guangzhou and Macao

Translation at GDUFS: contrastive EN-ZH translation, consecutive and simultaneous interpreting, computer-aided translation.

Computer science at MPU: data structures and algorithms, database design, discrete mathematics, artificial intelligence, data science and business analytics. In progress: natural language processing, machine translation.

RESEARCH

PaperCraft: a teacher-in-the-loop LLM authoring tool for Cambridge KET/PET MAY 2026 TO PRESENT

Final year project · sole developer and research design

Designed a seven-stage generation pipeline in which teacher adjudication is a required gate, encoded published item-writing rules for 15 Cambridge item types, and audited generated text against CEFR A2/B1 wordlists.

Instrumented the workflow so that teacher edit distance and classical item statistics (difficulty, point-biserial discrimination, distractor analysis) are captured as a by-product of ordinary use.

Specified the evaluation protocol: within-subject task timing against each teacher's own manual workflow, SUS, NASA-TLX, a content-quality rubric and interviews. Instruments are complete; data collection has not begun.

Transcreation in the age of generative AI: human translators versus LLMs in film title translation OCT 2025 TO PRESENT

Co-authored paper in preparation · three-person faculty-advised team

Developed the cognitive-linguistic framework: a three-tier model separating translation strategy from cognitive operation from cultural schema, with four schema operations ranked by cognitive load.

Synthesised the literature on functionalist title translation, regional norm divergence across Greater China and cultural bias in frontier models, verifying every DOI against Crossref. Argued that reference-overlap metrics such as BLEU are structurally unsuited to transcreation, because they penalise precisely the divergence that constitutes professional judgement.

TEACHING

Primary English Teacher, Cambridge KET MAY 2024 TO SEP 2025

Guangzhou Bella Education Technology · Guangzhou

Taught two small Cambridge KET classes and New Concept English, writing all lesson plans, courseware and weekly practice sets by hand, about two hours a set.

Tracked mastery of KET item types through classwork and periodic tests, adjusting pacing accordingly. That authoring burden, and the inability to control item difficulty from a small pool of past papers, is the problem PaperCraft was built to study.

English Teaching Assistant, Middle School Division JAN 2024 TO FEB 2024

New Oriental Education & Technology Group · Foshan

Supported middle-school English instruction and courseware production, kept a quantitative record of interaction frequency and mastery by topic, and ran differentiated one-to-one support with error-attribution analysis reported to parents.

TECHNICAL EXPERIENCE

IT Department Intern JUN 2026 TO AUG 2026

Guangdong Dowstone Technology Co., Ltd. (SZSE: 300409) · Foshan

Deployed and tested quantised open-source LLMs on premises with Ollama, measuring inference throughput.

Helped build a retrieval-augmented generation knowledge base over internal business documents, covering preprocessing and ingestion; also supported ERP and WMS maintenance and testing.

AWARDS & CERTIFICATIONS

First Place, CIUTI Short Video Contest, on the power of human translation and interpreting in the age of AI 2025

Outstanding Volunteer, 5th World Media Summit, reception for the BBC and NHK delegations 2023

NCRE Level 3, Linux application and development CERTIFICATION

SKILLS

LANGUAGES	Cantonese (native) · Mandarin (PSC Level 2-A) · English (TEM-4, working language) · Japanese (JLPT N4)
BUILDING	TypeScript · React / Next.js · Python · Java · PostgreSQL / Supabase · LLM pipelines, RAG and agents
MEASUREMENT	Classical item analysis · SUS, NASA-TLX and rubric design · SQL · R
