EDUCATION

Dual bachelor's degree: Translation Studies and Computer Science

SEP 2023 TO JUN 2027 (EXPECTED)

Guangdong University of Foreign Studies · Macao Polytechnic University · Guangzhou and Macao

Translation (GDUFS): EN–ZH contrastive translation, foundations of translation, English translation of Chinese culture, translation and international communication, interpreting, CAT. In progress: translation data mining.

Computer science (MPU): data structures and algorithms, Python and Java, computer organisation, databases, discrete mathematics, networks, software engineering, web development, AI, data science. In progress: NLP, machine translation, computer security.

RESEARCH

PaperCraft: a teacher-in-the-loop LLM authoring tool for Cambridge KET/PET

MAY TO OCT 2026

Final year project · sole developer and research design · completed

Designed the authoring harness the model runs inside: a fixed call sequence, machine-checked output and typed repair of a named failure.

Added a self-improving loop: an offline pass reads the teacher's correction log, induces candidate rules and folds accepted ones into later drafts, isolated per teacher across 15 item types.

Added answer-correctness checks the structural gates miss, and piloted the system with two practising teachers.

IELTS Coach: an open-source agent that interviews the learner before it writes

JUL 2026

Open-source learning tool (MIT) · sole developer

Released an open-source agent (MIT) that collects the learner's own material through a structured multi-step form, then generates answers constrained to the four IELTS band criteria. Covers 100 topics in the 2026 Sep–Dec bank.

Persisted per-topic state in JSON so study plans carry across sessions and exam seasons; built a validated bank parser, a one-click summary-site generator and an MCP vision proxy that lets text-only models handle Writing Task 1.

Transcreation in the age of generative AI: human translators versus LLMs in film title translation

OCT 2025 TO PRESENT

Co-authored paper in preparation · three-person faculty-advised team

Developed a three-tier cognitive-linguistic framework separating translation strategy, cognitive operation and cultural schema, ranking four schema operations by cognitive load.

Reviewed work on functionalist title translation, regional norms across Greater China and cultural bias in frontier models; argued that overlap metrics such as BLEU penalise the divergence that professional judgement produces.

TEACHING

Primary English Teacher, Cambridge KET

MAY 2024 TO SEP 2025

Guangzhou Bella Education Technology · Guangzhou

Taught two Cambridge KET classes and New Concept English; authored all lesson plans, courseware and weekly practice sets.

Tracked mastery of KET item types through classwork and periodic assessments; adjusted instructional pacing accordingly.

English Teaching Assistant, Middle School Division

JAN 2024 TO FEB 2024

New Oriental Education & Technology Group · Foshan

Supported middle-school English instruction; maintained a quantitative record of interaction frequency and topic-level mastery; delivered differentiated one-to-one tutoring with error-attribution analysis for parents.

TECHNICAL EXPERIENCE

IT Department Intern

JUN 2026 TO AUG 2026

Guangdong Dowstone Technology Co., Ltd. (SZSE: 300409) · Foshan

Deployed and tested quantised open-source LLMs on premises via Ollama; benchmarked inference throughput across configurations to inform model selection.

Helped build a retrieval-augmented generation knowledge base over internal business documents, covering preprocessing and ingestion; supported ERP and WMS maintenance and testing.

AWARDS & CERTIFICATIONS

First Place, CIUTI Short Video Contest, on the power of human translation and interpreting in the age of AI — 2025

Outstanding Volunteer, 5th World Media Summit, reception for the BBC and NHK delegations — 2023

NCRE Level 3, Linux application and development — CERTIFICATION

SKILLS

LANGUAGES	Cantonese (native) · Mandarin Chinese (native) · English (fluent) · Japanese (intermediate)
BUILDING	TypeScript · React / Next.js · Python · Java · PostgreSQL / Supabase · LLM pipelines, RAG and agents
MEASUREMENT	Classical item analysis · SUS, NASA-TLX and rubric design · SQL · R
